Desired position

Frontend Developer

Profile

I'm a frontend developer with expertise in React, JavaScript, and TypeScript. I possess understanding of user interface design, as well as testing and debugging processes. I am constantly improving my skills in these areas and remain committed to expanding my knowledge base with new and emerging technologies.

Experience

October 2022 —
till now

Frontend developer at Ezrababait

Project: Housekeeper search and booking system.

Technologies: React, Typescript, Next.js, Redux-toolkit, Axios, Formik+Yup, Headless UI, SCSS.

Achievements: Implemented housekeeper search and scheduling system, multifunctional calendar, which allows to choose the arrival time, cancel the meeting or change the order (days, time slots etc.) Registration, request creation, and job search opportunities have been created.

Education

Higher
2020

Belarusian National Technical University

Power Engineering Faculty, Automation Engineer

Professional development, courses

March 2022 —
October 2022

TeachMeSkills

Frontend developer

Technologies: HTML, CSS, SASS/SCSS, JavaScript, Git, React, Redux, Redux-thunk, Axios, Formik + Yup, Material UI, Styled Components, Basic knowledge Typescript.

Achievements:

The completion of my training courses was the implementation of the final project. The project is an online Pokémon store. During my work on the project, the following was carried out:

- Creation of an online store design;
- Choosing a technology stack (JavaScript, React.js, Redux, React-thunk);
- Division of the project into stages: creation of a new SPA application based on React; registration; authorization; product catalog; shopping cart; user profile with information about the user and his order's history, additional information pages;
- Deployed the project using the github-pages library;

January 2022 —
March 2022
